local community, general public Produce
educational
material

Where we are

Our bioclimatic building

Programs for school students

Thessaloniki – Sustainable city

Open spaces and the urban green

Active citizen in my neighbourhood, Depot / Eleftherio

Suburban forest of Thessaloniki

Any Rubbish to throw? No thank you!

Learning about climate change by playing

Programs for school students

Sustainable water management in our city

Water shortage in Waterland!

Two lakes – two histories

Consumerism: Advertisements and environment

Consumerism: My mobile phone!

Subject of free choice

Online programs for

school students

Climate is changing! What can we do?

A life with or without plastic?

Talking about my neighbourhood

<u>Thessaloniki – Sustainable city</u>

Active citizen in my neighbourhood,

Active citizen in my neighborhood,

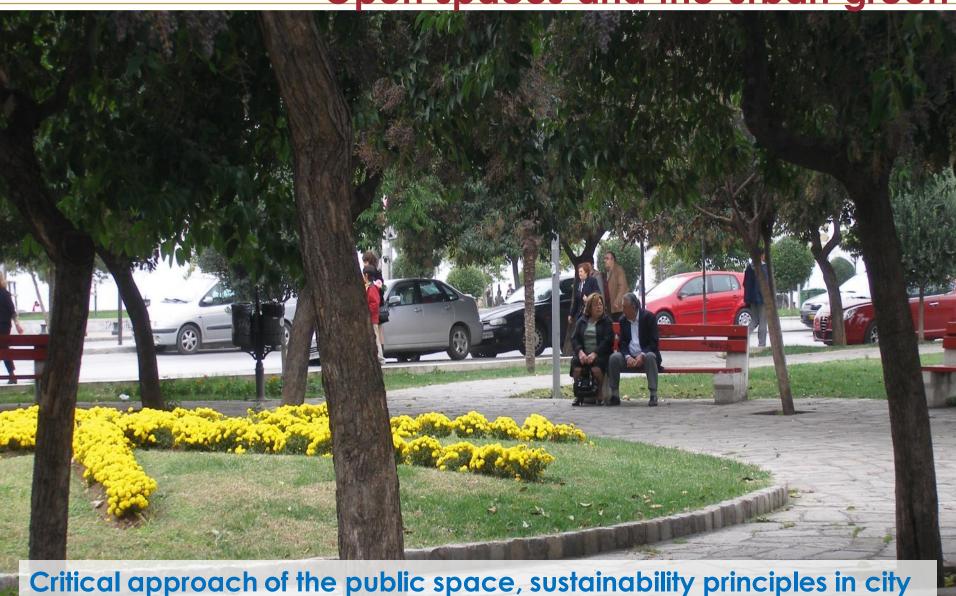

Urban walk in our neighborhood, to address local sustainability issues!

planning!

Open spaces and the urban green

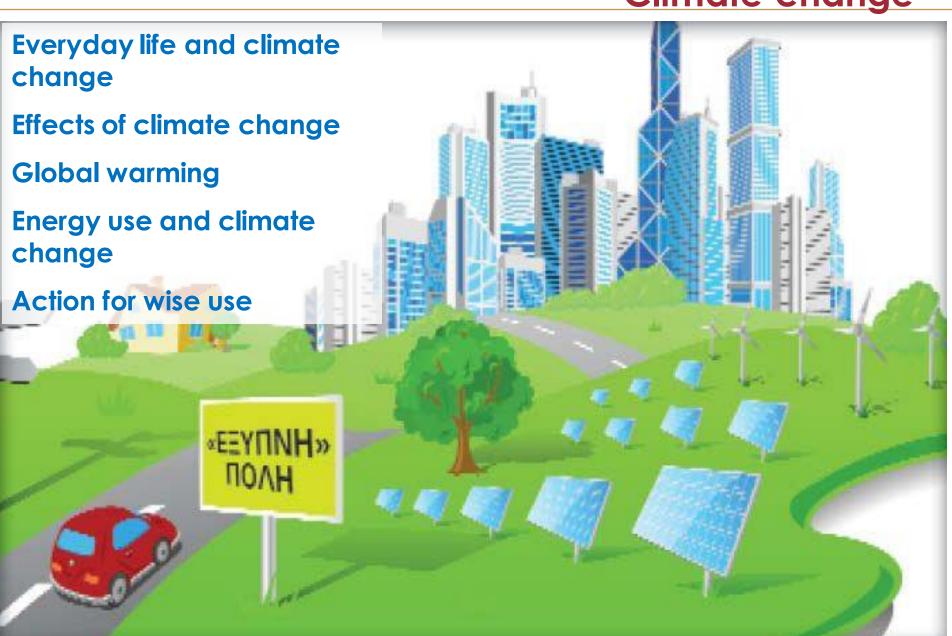

Urban green, urban farms

Climate change

Any Rubbish to throw? No thank you!

Waste as a sustainability issue. The need to reduce, reuse, recycle. Waste at sea. Plastic wastes.

Sustainable water management in our

Water shortage in Water Land!

Dramatizing a fairy tale for sustainable water management

The suburban forest of Thessaloniki

The role of the suburban forest of Thessaloniki in the lives of its inhabitants

Consumerism: my mobile phone

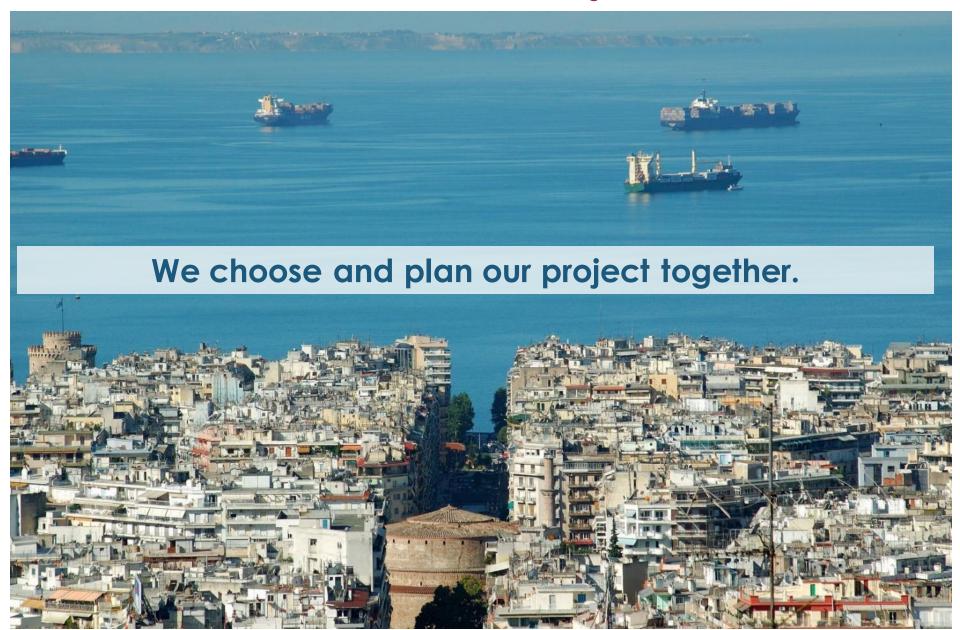

Advertising and the environment

Subject of free choice

Our focus: the urban environment

Most people live in cities

The city is connected

- To nature
- With problems of the natural and urban environment

explain...

AIR POLLUTION ENERGY **OUTPUTS** HEAT WATER LIQUID WASTES FOOD SOLID WASTES MATERIALS-GOODS NEW GOODS **PRODUCTS** INFORMATION INFORMATION THE RESIDENCE OF THE PERSON NAMED IN IDEAS **IDEAS INPUTS PEOPLE** PEOPLE

Our focus: the urban environment

We can not separate the city and its problems, from nature / wider environment

If the city is the main cause of environmental problems we must focus on the city in order to solve these problems

Improving awareness of the city people we will improve life conditions both in the city and diminish negative effects of the city to the natural environment

Our focus: critical thinking

all environmental issues are connected to natural, social, economic and political dimensions.

Community responsibility

Institutions

Personal responsibility

Attitudes and behavior

SUSTAINABLE G ALS

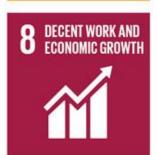

Sustainability education should:

... be relevant to students' life

...follow an integrated approach

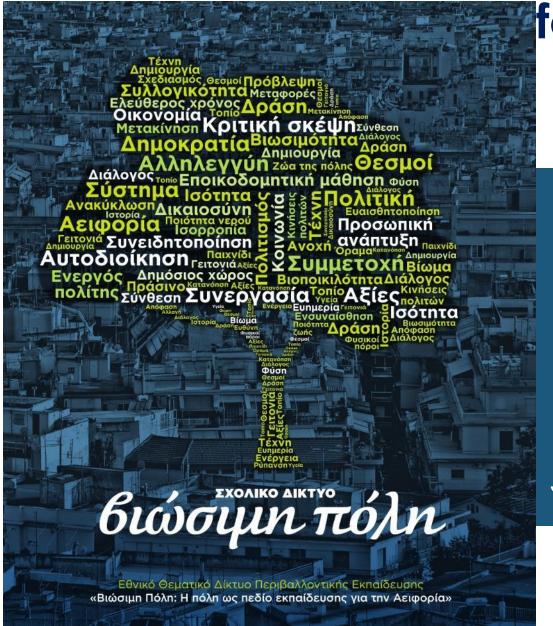

... promote critical thinking...

... highlight underlying values

...encourage involvement

National school network

for environmental education

Sustainable City:
the city as a
training field for
sustainability
education

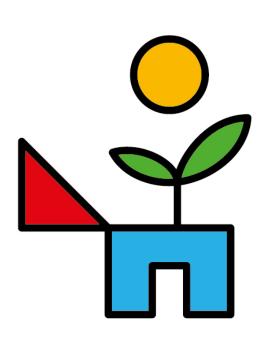

50-90 schools per year

Local school network

Thess. Τα σχολεία Climate προστατεύουν

Αλλάζουμε την ενεργειακή συμπεριφορά στο σχολείο

www.thess.climateschools.org

Schools protect the climate

2019-21

In cooperation with NGOs (ANTIGONE, H. Boell Foundation)
